

OVERVIEW

With over 40 years of experience in the epoxy industry, RESIN8 can offer proven systems that meet the needs of today's demanding applications. Our epoxy systems are formulated for the specific needs of the food, brewery, pharmaceutical, soft drink, and heavy industrial industries. With ever-increasing hygienic regulations, steam cleaning becomes more frequent at the same time that cleaning agents are becoming more concentrated and corrosive. This requires an epoxy system with excellent chemical resistance and resiliency to thermal shock.

Features of RESIN8 systems include:

- Built-in resiliency for thermal compatibility to concrete
- High chemical resistance
- Excellent adhesion to damp, green or old concrete
- Primer-less application of all systems
- Fast set times of 2-4 hours at 73° F
- Low VOC / low odor / solvent free formulations
- Easy clean up with only soap and water
- USDA compliance

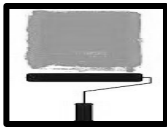

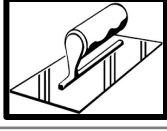

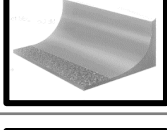

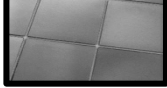

RESIN8 offers a variety of 100% solids and water-based epoxy products for many applications. Our primary 100% solids epoxy product, **RESFLOOR**, is so versatile that you can build an entire Epoxy Floor System with it.

RESFLOOR

RESFLOOR offers the versatility to stock one resin yet allows you to build an entire Epoxy Floor System with 8 different uses simply by adding fillers.

RESFLOOR, a 100% solids epoxy resin, bonds to GREEN concrete, is fast setting, resilient, low odor, and is a user-friendly 2A:1B mix ratio.

8 APPLICATIONS... ONE RESIN		RESFLOOR # 8000	Filler
1. PRIMER		✓	N/A
2. COATING & SEALER		✓	N/A
3. TROWEL-ABLE		✓	+ TL Sand Blend
4. SELF-LEVELING		✓	+ SL Sand Blend
5. PATCHING		✓	+ TL Sand Blend
6. COVING		✓	+ Silica Sand
7. CRACK & COLD JOINT REPAIR		✓	+ Silica Sand
8. TILE/BRICK BEDDING & GROUT		✓	+ Silica Sand or Quartz

Note that all products can be colored using Dispersion Pak or Tint (dry pigment)

PRODUCT OFFERING

RESIN8 offers a variety of 100% solids and water-based epoxy products designed to meet today's demanding requirements for the food, beverage, brewery, pharmaceutical, municipal, and industrial markets.

Category	Product Name	Product #	Description
100% Solids Epoxy	RESFLOOR	8000	Versatile and resilient epoxy with high chemical resistance, 2-4 hour set time, and designed to replace the need for stocking multiple products
	RESCOAT-FS	1000	Fast set epoxy color coating for floors and walls
	RESCRETE	2003	High temperature epoxy-cement floor system handling temperatures up to 450°F
	RESCIPP	4000	CIPP industry epoxy pipe lining system
Water-Based Epoxy	RESHYDROPRIME	3002	Water-based primer for green concrete, metals, and roofing materials
	RESHYDROCOAT	1002	Water-based color top coating for concrete and metal
	RESHYDROTOP	1003	Economical water-based color coating for asphalt and concrete (not smooth)
	RESHYDROSEAL	1004	Very clear, water-based top coat sealer for smooth/ decorative concrete
Liners, Grouts, & Caulks	RESLINER-CS	4002	Municipal manhole flexible chimney seal system that can be trowel applied
	RESLINER-MH	4004	Municipal manhole epoxy liner system that can be trowel applied to damp brick and concrete
	RESGROUT	5000	High chemical resistant epoxy tile grout/adhesive
	RESGROUT-HCR	5001	Very high chemical resistant epoxy tile grout/adhesive (98% sulfuric)
	RESGROUT-WW	5002	Water wipe-able epoxy grout system
	RESCAULK	5004	Flexible epoxy filler for expansion joints
	RESGEL	5006	Gel based non-sag filler
	RESLUBE	6000	Slippery water lubricant
